GAUJA NATIONAL PARK

Enter the Gauja National Park – place, where the history, culture and nature allow you to enjoy the primordial with your own eyes, ears and hands. Each moment and each experience at the Gauja National Park is embraced by nature. Besides, this is not an ordinary park, it is park, where each encounter can become a new experience, enriching it through play, study and challenges. Variety of adventures allows each traveller to choose one's own place and scenario.

Like a fern that unfolds its fan of leaves while blooming, the river Gauja leads us deeper into the mysterious and untouched world of the nature, where every tree has its own story about ancient occurrences and legends. The time itself does not flow straight here, it flows in curves full of rapids just like the river Gauja, merging the present with the tales of the old times that have left their unique mark in the scenery and the people. All that is left to do is to breathe the misty morning fog, touch the moist landed trunk and loose oneself in the forked paths of legends, where the stems of grass are vibrating with life, souls dwell in the breeze and boulders bloom in ravines... ENTER GAUJA

NATURE

The biggest national park in Latvia was established more than 40 years ago. Gauja National park protects the rich nature of the ancient Gauja River valley and its surrounding areas as well as the vast diversity of plant, bird and insect species found here.

Nature enthusiasts can observe one of these rare species at the Gauja NP:
 Tree lungwort *Lobaria pulmonaria*
 Luminescent moss *Schistostega pennata*
 Northern bat *Eptesicus nilssonii*
 Common kingfisher *Alcedo atthis*
 Perennial honesty *Lunaria rediviva*

GAUJA VALLEY

The origins of the ancient Gauja River valley go back more than 350 million years, but its current ravine-ridden terrain was moulded by the glacier meltwater at the end of the Ice Age. The Gauja, which is the longest river in Latvia (452 km), winds through the national park.

HISTORY

The river once served as a trading route, and the Livonians built their settlements on its banks. Strong stone castles, which were enclosed by steep slopes and deep valleys, were built in the 13th century. The cities and the social and cultural life grew around these castles.

NOWADAYS

Today, the park is a place where legends of the past live alongside modern and cosy guest houses, restaurants and leisure spots. Here you can enjoy the aura of antiquity in old castles, receive a burst of energy at one of the ancient sacred places or experience the healing properties of the springs. You can also touch trees planted by kings, hear your voice echoing off sandstone rocks, or let the nature trails carry you off into rich forests. All of this should be enjoyed slowly, letting the taste, smell and colours introduce you to the rhythm of the local life. This is best done by hiking, riding a bicycle or a horse, or even taking a boat down the gentle stream of the Gauja River.

PLACODERMS – THE WITNESSES OF THE PAST

During the Devonian period (400 million years ago) a warm and shallow sea spread across the current territory of the Gauja NP and at the bottom of it dolomite and sandstone were forming. The sea was home to the placoderms and a multitude of fossils have preserved until today. There are still places in the park today where intact placoderm bodies can be found in the Devonian period strata.

GAUJA TRAVEL AROUND

Train

The railway line Rīga – Valka/Valga goes through the Gauja NP ensuring a convenient and regular opportunity to travel between Rīga, Sigulda, Cēsis and Valmiera throughout the whole day. There are special bicycle racks on the trains for transporting bicycles.
Get to know train schedules and buy tickets: www.mobilly.lv

Bus

All of the territory of the Gauja NP can be easily reached by buses which run from Rīga to Sigulda, Cēsis and Valmiera approximately once an hour. Travelling by bus between populated places within the Gauja NP has to be planned in accordance with the bus schedules.
Get to know bus schedules and buy tickets: <http://www.1188.lv/transport>

Bicycle

The starting point of a picturesque bicycle ride can be the train station. There are countless bicycle routes within the Gauja NP which will allow you to explore the rich nature, history and culture of the region. We suggest you avoid the busy highways A2 and A3 and take backroads and forest roads instead.

Boat

Whenever Gauja is ice free, many tourists take the opportunity to go boating in it in inflatable boats, canoes or on rafts. Amata and Brasla are also suitable for boating.

Car

The Gauja NP is located between highways A2 and A3 and has a dense network of roads and parking lots. The majority of the tourism objects are easily accessible by car.

SPAWNING OF SALMON-LIKE FISH IN GAUJA NATIONAL PARK

The “central artery” of Gauja National Park is the River Gauja with many tributaries. Many of these are rapid and swift, with clean, unpolluted water enriched with water coming from many springs, and therefore they are suitable for spawning of salmon-like fish — the Atlantic salmon (*Salmo salar*), brown trout (*Salmo trutta*), and stream trout (*Salmo trutta fario*). After a longer trip, the salmon-like fish travel in autumn to their birth places, and thus this is the time best suitable not only to watch the fish, but also enjoy what is happening on the riverside. A salmon watcher is a sort of a ranger, who has come to study the natural environment and create a positive effect from the presence of a human being.

Time to go:
Late October, beginning of November.

Best places to watch fish
The success of spotting salmon-like fish depends on the water table in rivers, the clarity of water, and weather conditions. If there was heavy rain prior to or during the migration, the water in Gauja and its tributaries will be mixed up with sand and loam particles which will make it dark and non-transparent. It will be hard to see the fish in such case. Other more suitable places might be an option — natural or man-made obstacles: rapids, waterfalls, low dams, or fish ladder, which the salmon-like fish have to pass by jumping over these!

Bridge over the River Gauja in Sigulda

A site easy to access — approximately 2 km from the centre of Sigulda. A popular place to watch salmon..

Pedestrian bridge over the River Gauja in Sigulda

The walk to the bridge (2 km from Kaķīši in Sigulda) can be combined with a walk along the banks of the primeval valley of the River Gauja.

Trail aimed at watching fish spawning in Līgatne

Established in 2011 with the support of the European Fisheries Fund in the centre of Līgatne, between Ānfabrika Cliffs and Lustūzis (opposite of Līgatne Tourism Information Centre); around 500 m long. Fish ladder is constructed at the former mill dam in Līgatne.

Kārļi Dam

On the River Amata. Fish ladder is established next to it. The dam can be reached by road leading from Kārļi or Ieriķi, or on foot along the Amata trail.

Nature trail of the River Ieriķupīte

The small River Grūba (Ieriķupīte, Melderupīte) flows into a deep ravine behind the road A2, where on a short section of the river four waterfalls are located — 2.3 m, 0.5 m, 1.7 m, and 0.8 m high, which consist of dolomite rock outcrops from Pļaviņas suite.

River Strīķupīte

Around 3 km long section of the river between Jenči–Jāņmuiža road and the mouth of the River Strīķupīte with the River Gauja.

Bridge over the River Gauja in Cēsis

3.5 km off the centre of Cēsis.

Bridge over the River Gauja in Rāmnieki

Easy accessible from Cēsis. The river is shallow in this place and fish might be clearly spotted under suitable circumstances.

River Vaive

The best places to watch salmon are downstream — in the section where the river mouths the River Rauna till Vaive Mill Dam.

Bridge over the River Gauja in Valmiera

Located in the centre of the city (Cēsu iela), near Vidzeme University College.

MUSHROOMS OF GAUJA NATIONAL PARK

There are more than 4000 various mushroom species in Latvia. Mushrooms are extraordinary organisms combining the features of plants and animals. Not for nothing they have their own fungi kingdom. Mushrooms vary very much in terms of colours and shapes, and therefore are interesting to watch. There is a huge biodiversity in Gauja National Park — dry and wet forests, forests of slopes, secular trees, old and decayed trees, deadwood, former manor parks, etc., which create a rich variety of mushroom habitats. During the respective time, the number of spotted species and shapes will be impressive! A well-prepared guide is needed to complete this “mission” with success.

Dress code and tools:

- suitable clothes for various weather conditions and types of forests (including wet forests);
- rubber boots;
- basket and knife;
- mushroom identifier;
- magnifier;
- notebook;
- smartphone to post your special moments on social networks or make use of mobile applications — guides in the identification of mushrooms;
- navigation device in order not to get lost.

Time to go:

Mushrooms are spotted during the whole year (also in winter), but the best time is July–September demonstrating the largest variety of species.

Most interest places to watch mushrooms

Forests of Silciems

1–1.5 —km range around the Silciems Railway Station is among the most popular place to go for mushroom picking in the Greater Riga Area. Here you might find edible mushrooms popular in Latvia — various species of chanterelles, russulas, king boletes and other boletes, woolly milkcaps, orange milkcaps, gypsy mushrooms, etc. Most interesting is the chestnut bolete (*Gyroporus castaneus*), lurid bolete (*Boletus luridus*), edible polypore — sheep polypore (*Albatrellus ovinus*); an edible mushroom popular in Scandinavia) and the coral mushroom (*Ramaria aurea*).

Forests of Lielstraupe

A large forest 1–2 km southward, south-westward of Lielstraupe, where the largest of cap mushrooms in Latvia can be found — parasol mushroom (*Macrolepiota procera*). It is edible uncooked, or fried like pork chop. Wide range of cap mushrooms, including edible mushrooms. The car can be parked in the centre of Lielstraupe.

Vicinity of Zvārte Rock

Excellent landscapes and ideal places to pick mushrooms along the banks of Amata, heading along the nature trail from Zvārte Rock to Veclauči Bridge (~4 km). The medical mushroom chaga (*Inonotus obliquus*), as well as alder bracket (*Inonotus radiatus*) can be found here. The alder bracket has surface of changing colour depending on the viewpoint angle. Various mushrooms with a decaying effect are found on fallen trees.

Ungurmuiža Park

Notable due to the old oaks. Interesting polypores are growing on the trunks of fallen oaks. One might be lucky and spot the bright-coloured polypore *Hapalopilus croceus*, as well as other mushrooms related to oaks in autumn. Park your car near Ungurmuiža Manor.

Vicinity of Lake Vaidava

Wooded area (within a range of 1 km) eastward of Lake Vaidavas, and slopes of the lake shores. Here you might find the summer bolete. Park your car near in the parking lot near the swimming place of Lake Vaidava.

BIRD WATCHING IN GAUJA NATIONAL PARK

Bird fauna in Gauja National Park in terms of nature tourism is appreciated both by foreign and local tourists. The largest nesting population of grey wagtail in Latvia is just one example. Although these are just few pairs, in terms of access and concentration it is the safest place in Latvia to watch this species during the nesting period. The forests of slopes with old deciduous trees attract less common species of woodpeckers (white-backed woodpecker, three-toed woodpecker, black woodpecker, middle spotted woodpecker). Relatively often spotted are the

elsewhere rare greenish warbler, red-breasted flycatcher and locally common hazel grouse. Ural owl has started nesting in the park, and the smallest owl of Latvia — pygmy owl — is also seen more often. Many corn-crakes and some species of warblers, which are not common in Western Europe (river warbler, Blyth's reed warbler), are found in the riverside meadows of Gauja. Rivers which are not covered with ice during the winter are home to the wintering white-throated dippers. Similarly, kingfisher is seen more often than elsewhere on the small rivers and

ice-free rivers, oxbow lakes, or larger areas where the springs come out of the earth. Significant habitats are the parks and alleys of former manors attracting much more common and thus easily spotted species of birds (woodpeckers, tawny owl). During the migration period, the migratory birds like stopping over at former or present quarries (in Lode, Bāle, Cēsis) and the largest lake of the park — Lake Ungurs. Meadows adjoining to the Suda Bog located outside of the reserve area are a significant place where the cranes gather in autumn.

📍 There are marks and arrows.

River Amata. Rocks and cliffs of the river

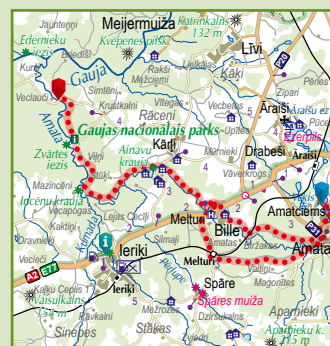

For travellers not afraid of large and frequent terrain differences, and also for those wishing to see and enjoy the beautiful banks of primeval valley of the River Amata while heading along remote forest paths. The path leading along the right bank travels through the upper and lower part of the valley, and therefore at some places difference of more than 40 m in height is experienced. This is sort of a geo-tourism route with an insight of dolomite and sandstone outcrops from the Devonian period which are found in the primeval valley of the River Amata shaped by the glacier.

Amatciems – Melturi – Kārļmuiža – Kārļi – Zvārte Rock – Veclauči Bridge

☀ April – October

🕒 8–11 h, where:

- 1) Amatciems – Melturi 2 h,
- 2) Melturi – Kārļi 3 h,
- 3) Kārļi – Zvārte Rock 4 h,
- 4) Zvārte Rock – Veclauči Bridge 1–2 h

➡ ~21.5 km. The route can be made by combining any of its sections:
1) Amatciems – Melturi 5 km,
2) Melturi – Kārļi 3.5 km,
3) Kārļi – Zvārte Rock 9.5 km,
4) Zvārte Rock – Veclauči Bridge 3.5 km

🚶 Difficult

🚶 Mainly forest paths; gravel road in section Amatciems – Melturi

📍 In Amatciems or at the road Rīga–Veclaicene (A2)

📍 Veclauču Bridge, destination for canoe-riders "Amata"

📍 Orange and bright red blazes – diamonds on tree trunks (in the section from Melturi to Veclauču Bridge)

Cēsis – Valmiera

The route runs alongside the primeval valley of the River Gauja linking two historic centres – Cēsis and Valmiera. The section between Rāmnieki and Valmiera leads pre-dominantly along remote forest roads and paths offering excellent places to watch wildlife in Gauja National Park, but hiking there is quite strenuous.

Cēsis: Cēsis Railway Station – Ērgļu (Ērgļu) Cliffs – Rāmnieki – Sietīņezis Cliff – Valmiera

☀ End of April – middle of September

➡ ~45 km

🕒 For hikers – 2 days (Day 1 Cēsis – Sietīņezis Cliff – 25 km; Day 2 Sietīņezis Cliff – Valmiera – 20 km), for cyclists – 1 day

WATER ROUTES

Gauja River

Gauja is the most popular water tourism river in Latvia. The main tourist magnets are the beautiful river banks rich in sandstone outcrops, easy accessibility of the river, dense network of accommodation sites for water tourists, the nature of the river (suitable for various paddlers), long water tourism traditions, and the status of a national park. In this section, the river flows through its primeval valley which is among the most impressive Baltic terrain forms.

Brasla River

Although the river is classified as "small", this section of the river does not have the typical obstacles the small rivers have — trees fallen over the river, stacks of trees and branches in the river, and traces of beavers. Faster rapids are experienced in the section downstream of the water power plant till its mouth with the River Gauja. When the water level is higher, the shallow places, stones, and islets are below the water; however, in case of lower water level at some places these may hinder the paddlers and one shall be ready to step out and push the canoe. The trip on Brasla is enriched with the many sandstone outcrops.

ENTER NATURE

5 | Gūtmaņala (Gūtmanis Cave)

The walls of the biggest cave and the oldest tourism object in the Baltics have witnessed many events and bear inscriptions from the 17th century. A man called "gut man" by the local people used the water for healing, thus the cave was named after him. This is also the place of origin of the beautiful story about Rose of Turaida who used to secretly meet up with her beloved Viktors here.

8 | Zilaiskalns (Blue Mountain)

It is an ancient sacred place, a medieval burial ground and a protected area. People tell a certain story of the special properties of Zilaiskalns: when the spring with healing properties for eye illnesses on top of Zilaiskalns dried out, people started using the sand for healing instead. Zilaiskalns is thought to

have been a meeting place for witches, therefore people come here to foretell the future and sacrifice.

Kocēni County. GPS: 57.5485, 24.6915

9 | Sietiņiezis (Strainer Rock)

The largest white sandstone outcrop in Latvia has many artistic niches, cavities and caves. It is believed that the rock has gotten its name from the bee caves which look like little holes in its surface, thus, resembling a strainer. However, its largest protrusion Velna papēdis [The Devil's Heel] carries the name of the devil himself.

11 | Ķūķu klintis (Ķūķu Cliffs)

The biggest sandstone outcrop of the Devonian period in Latvia. There are rapids at the beginning of the cliffs with the relative decline of 0.5 m/km. Right beyond the rapids, opposite the highest point of the cliffs is the deepest whirlpool of the Gauja (about 7 m). The cliffs also have their own story: they got their name from the nearby houses "ķūķi", but "ķūķu porridge" or "ķūķis" was a traditional Latvian winter solstice meal.

Might be observed only from opposite side of the river. GPS: 57.2741, 25.1066

12 | Līgatne cellar caves and cliffs

Many of these artificial caves (more than 300) were built already in the 18th century. People used to store food in them, but during the Tsar times the Līgatne Paper Mill used them to store paper. The secret of these caves is the temperature which remains the same

both in the summer and in the winter. Caves are recommended be visited together with a guide.

17 | Velnala Cave and cliffs (Devil's Cave)

Velna ala (Devil's Cave) is an ancient cult place and has formed in the cliff 8 m above the water level. People who know this place well will tell you that once, while sleeping in the cave, the devil completely blackened its walls with his breath. The next evening he escaped through the top of the cave and ran straight into the Gauja whirlpool where he still sits today and drags in the occasional careless visitor.

20 | Gūdu iezis (Gūdas rock)

The 250 m long and 18 m high sandstone cliff is often admired because of its resemblance to a stem of a huge ship. Story says: in the nearby Gūdas houses once lived a very miserly man who had promised his soul to the devil. The devil had dragged the man along with his bag of money into the deep whirlpool opposite the Gūdas cliffs.

When passing this whirlpool, the raftsmen always offered up silver coins to safely pass this complicated curve

Might be observed only from opposite side of the river. GPS: 57.2494, 25.0047

21 | Kalējāla (Blacksmith's Cave)

Some 20 years ago it was the longest cave in Latvia. Time has passed and previous record-owner has changed a lot. The cave is formed in soft sandstone rock and its entrance collapses time by time. Legend says – years ago there was a blacksmith who used to live in the cave.

Hidden in Noble Silence

This is your opportunity to savour the jewels that noblemen have safeguarded in the cusp of the forest for time eternal. Venture forth, rapt in contemplation, essaying your brush back and forth over the canvas, listening to the paint plotting its way into the canvas, and sipping tea in the manor garden, where you will hear the tick tuck of the venerable lord's clock.

We invite you to discover Latvia, travelling through time and enjoying the tranquillity of the historic residences of the aristocracy fanned by centuries of impressive history. The authentic hospitality of the nobility awaits you, along with the opportunity to step into the world of Latvia's nobility and to encounter its broad heritage, as well as to embark on a stately journey amid impressive settings nestling among painterly landscapes.

During your journey, you will be welcomed at the most important manor houses, castles and palaces in the Gauja region, offering fine dining and accommodation options, and an eclectic offering of additional services, ranging from tours recreating the epochs of the nobility through to scenic horse carriage excursions through the Latvian countryside.

Listen in noble silence!

WILD AT PALATE

In 2017 the Rīga-Gauja region offer earned the honour of being European Region of Gastronomy. Latvian cuisine and gastronomy traditions have one thing in common – almost everything that was on our table, could be seen out of the window. Birch water in spring allowed to wash away the winter tiredness and waste from the bones, the meadow herbs were used as spices or in teas to keep in the home medicine chest. The forests gifted us with meat, mushrooms and berries, but rivers, lakes and the sea – with fish. At the same time, it agrees with the Latvian chefs' manifest of modern Latvian cuisine, which invites us to "create new recipes, where up-to-date local products are used" and "diversify the diet by using seasonal products". In honour of the title "European Region of Gastronomy 2017" three official Rīga-Gauja souvenirs were chosen by creating a competition. They can be purchased in tourism information centres. Also, by continuing a tradition, restaurant weeks take place in the region twice a year – in spring and in autumn.

Birch syrup

Birch syrup is a unique product with an extraordinary taste and it is a great garnish for both sweet and salty foods. You will taste a bittersweet and a little sour caramel flavour, which is a great addition to

salads, grilled meat or apple cake. The syrup contains 95 % of birch syrup and 5 % of sugar. It does not contain preservatives.

Fruit tea "Taste of ancient Gauja Valley"

Fruit tea will let Gauja Region guests feel the generosity of our nature and the ability to give people the dearest - health and joy of living. The tea contains healing herbs that have been gathered from Gauja Ancient Valley and are full of the strength from the earth and the energy from the sun. The taste and the smell is made of chamomile blossoms, forest raspberry leaves, willowherb tops, peppermint leaves, hazel tree leaves and thyme tops.

Candied rhubarb, cranberry and quince

Rhubarb is a sour and juicy vegetable, which contains very little calories. Rhubarb is a source of mineral substances, vitamins and antioxidants. Candied large-berry cranberries and quince is a great alternative for sweets - they are tasty and very healthy. Cranberries contain vitamin C and B1, which improve immunity and speeds up metabolism. Quince is a source of mineral substances. As the taste of these candied foods is so distinctive we add only sugar to them and there is no need for taste enhancers, preservatives or dyestuff.

SPRING

The year starts in spring with birch sap and maple syrup, whose just-tapped freshness lasts but a brief moment. The fermentation will result in a sweetly sour, sparkling libation to your liking. Just about everyone – not only gourmets – following winter hibernation, crave the first greens that sprout up – aromatic, succulent, crisp and chock full of vitamins. The season's first sorrel, leaf lettuce, rhubarb simply reek of the reawakening land's strength and vitality – an opportunity not to be missed!

Rhubarb

Every Latvian household has a shrub of rhubarb, not only for its useful traits, but also for its looks. It is used in various gastronomical gluttonies – rhubarb pie, rhubarb jelly, rhubarb ice-cream, rhubarb chutney, rhubarb jam, rhubarb salad and a few dozen other delicacies.

Sorrels

The first sorrels unmistakably indicate that the spring has truly arrived. Sorrels are used in many ways – in salad together with chives or rustic goosefoots, nettles, and dandelion, with cottage cheese, as pie filling, in lavish stews, and, of course, in soup.

Birch and maple sap

The colder the winter, the sweeter the sap. It is used as a wine, sorbet, ice flakes, salad dressing, beauty compresses, and for detoxication – no reason to skip on. You could also ferment it with a pinch of sugar, some raisins, and black currant twig, for your own champagne!

SUMMER

Latvian summers are short but nonetheless full of gastronomic goodies that can be savoured in the right place, at the right time. Nothing provides more pleasure than tending a garden, venturing deep into a forest for wild strawberries or chanterelle mushrooms, or choosing a spot lake or riverside for fishing. This is how we can explain why all our desserts have cherries on top, why the kitchen table has jars of jams and jellies all in a row, why on our grills and in our smokehouses – ready to prepare, are the fish we have caught.

Catfish

The largest fish in Latvia, it can reach up to 250 kilos in weight. To make catfish more delicate, one should leave a whole gutted catfish for two to three days in cold in order to serve a pinkish fish of light consistency. The fishbone can be used for making a strong bouillon.

Sour cherries

The sour cherries are excellent for one's health, as, besides vitamins and minerals, the sweet-sour berries contain a lot of melatonin, which helps the human body to fight aging and insomnia. Devoted housekeepers insist that a jam or wine should be made just from the sour ones.

Cloudberry

Cloudberry hides in deep and far marshes. However, if you are lucky to find them, they can be used in making of a honeyed jam which perfectly complements dessert cheeses or fruit salad. Despite everything, cloudberry is the queen of contemporary forest

gastronomy.

AUTUMN

The beautiful and scrumptious penny-bun mushrooms, just waiting to be picked, and sauteed in a cream sauce with the new crops of potatoes. Or how about the abundant quince [The quince is the sole member of the genus Cydonia in the family Rosaceae], that yellow fruit perfect for syrups or candied peel (succade), in the teapot, on a plate with game meat. The Latvian hunter – eager and enthusiastic, to say the least. Deer and moose on the loose are merely 'value added' to the cherished moments spent in the wood and brush, the invigorating air. And – a post-hunt feast tastes even more delicious.

Cydonia

The hard, golden fruit named quince or cydonia is known as Latvia's lemon. It is referred to as one of modern Latvian cuisine's trademarks. It is utilized in marinade when cooking lamb, a tangy additive in homemade sweet wines, and for jams, served with select cheeses.

Venison

Deer parks in Latvia are abundant and impeccably managed. Venison is perfect for a seasonal stew, or in select restaurants as tartare or steak. A venison roast – is there anything more appropriate for a holiday meal? Perfect for Independence Day on November 18!

Penny bun

Latvia is a mushroom-picking nation, and the penny bun is considered the ultimate prize for those venturing into the woods. You can simply sautee it with butter, braise in cream with young potatoes, sun-dry, and so on. Just

remember – the penny buns you pick yourself – taste the best!

WINTER

Cold and damp weather in Latvia results in fare that is rich and filling, with character. Simple but sturdy foods from garden vegetables and grains. Potatoes and barley, rye products – through the centuries are a reminder of home fires burning. But what about the rowan berries? Beautiful and mildly tart – for a real taste of life.

Rye bread

It goes without saying: nowhere on planet Earth the rye bread is more delicious than in Latvia, and it's taste is a result of our history, memories, dreams, and philosophy on the order of things. It's not surprising that rye bread is what every Latvian living abroad craves for.

Rowan

Dried and powdered, the red-orange rowan berry is a subtle spice for various sauces and marinades. In jellies and marmalade it is an ideal accent for meat dishes or mild cheese. And as a liquid additive for your cocktail, it is the best that a berry can offer alcohol.

Turnip

Making our noble contribution to the current renaissance in long forgotten herbs and veggies – we give you: the turnip, stupendous in stews! Or simply baked in the oven, but better yet – in a salad with smoked fish and nuts. The turnip – just doing what comes naturally!

ENTER FAMILY

“Dormouse, Do-o-ormouse!”, a pesky buzz rings straight into the ear. Dormouse scratches his tail. The tail was wade awake too. The tail, fluffed up like an owl, tickled the Dormouse’s nose. “Oh, the cruel world! Why do I have to get up so early?”, Dormouse grumbles squinting his sleepy eyes at the fading rays of the drowning sun. “Whose squeaky little voice is that?” It is the Dragonfly sitting on the edge of the tree hollow and fluttering its wings. “Good morning!” “Good evening!”, Dragonfly giggles and disappears into the wind. Dormouse sets to his morning routine.

Dormouse, a cute, chubby little animal, is often mistaken for rat. To set himself apart from the rodent, he has nurtured the distinct talent all dormice have. Dormouse was good at jumping. Oh, and what a jumper he was! Swoosh – from a hazel tree onto the spruce, oh my, almost missing the home sweet home in the hollow. Last year, while visiting the family, younger cousins had pulled Dormouse into a competition. Nothing special, family members only. Nonetheless, Dormouse jumped a whopping 10 yards! The prize was a whole bag of hazel nuts. Yummy! Overwhelmed by the savoury memory, Dormouse licks his constantly-growing front teeth and thinks of a snack – a slightly bitter willow tree stick, or something of a kind. “Must move!”, he concludes. As usual, before anything else, he begins by counting the fingers and toes on his front and back paws. “Ten and eight. Enough for setting out into the night. But where should I go?”
